

Making the Green Transition Work

The U.S. tugboat, towboat and barge industry may already be the safest, most environmentally friendly, and most economical mode of freight transportation, but it is faced with the challenge of making a transition to a low-carbon future that is already seeing trucking companies add electric vehicles to their fleets and railroads eye emerging technologies for zero-emissions locomotives.

What green technology offers the best options for tugs, towboats and barges? How much of it is retrofittable to existing vessels? And with a continued labor shortage, should the industry be exploring its semi-autonomous options?

These are some of the issues on the agenda for Marine Log's TTB –Tugs, Towboats & Barges, which will take place March 7 and 8, 2023 at the Renaissance Mobile Riverview Plaza Hotel in Mobile, Alabama.

Marine Log's Tugs, Towboats & Barges is the only event where these pivotal markets converge—bringing together tug and towboat owners, operators, builders, designers, and stakeholders. Sponsorships allow your company to position itself as an industry leader, shape the dialogue in the industry, and leverage networking opportunities.

KEY TOPICS

- Embracing the technology shift as we move toward zero-emissions
- Finding green tech funding
- Beyond COI: What's next?
- Vessel concept panel (powering technologies: diesel, natural gas, hydrogen and battery electric)
- Crew training for new systems
- Waterway infrastructure and spending
- Building new barges amid record pricing
- Alternative fuel sources for tugs and towboats;
- Newbuild project overviews
- Market changes as the economy moves away from coal and oil

TARGET AUDIENCE

- Tug and towboat owners/operators (CEOs, presidents, founders, operation managers)
- Naval architects
- Shipyard supervisors
- Suppliers
